

Access evidence for thousands of products—all from one site

FormularyDecisions® provides US healthcare decision makers with connections to peer community opinions, access to evidence-based resources, and communication exchange with life sciences manufacturers

Acquire product information early

- Helps to reduce product review time for new and investigational products
- Access pre-approval information, clinical trial summaries, and P&T considerations
- Attend AMCP Pre-approval Information Exchange (PIE) Webinars
- Access formulary coverage insights data

Connect with biopharma companies

- Seamlessly request dossiers, clinical, and economic information from numerous manufacturers
- Provide feedback to support the exchange of information

Review, compare and evaluate evidence

- Review product information on over 3,000 FDA-approved and pipeline products*
- Utilize a centralized information repository of more than 1 million evidence links to credible scientific resources**
- Gain complimentary access to full-text articles from evidence-based literature

Share expertise and earn rewards

- Provide targeted feedback through disease state specific product surveys
- Evaluate the usefulness of evidence sources

** Job roles were self-identified by users during the registration process

“The team I oversee uses FormularyDecisions to find pertinent research instead of utilizing individual sites/web searches. Additionally, the dossier request tool is important – most of the team doesn’t have a relationship with the pharma reps, so having a centralized place to request is much easier than trying to track down a contact with individual manufacturers.”

– Vice President, Medicare Part D, Pharmacy Benefits Manager (PBM)
